

RAVAGES OF RIVER ALAMO.

WORKS HAVOC TO RAILROAD IN IMPERIAL COUNTRY.

Grumbling Banks Drive Tracks Further Back for Second Time. Shows Out Deep Channel East of Colorado and Threatens to Drain Water from Main Canal System.

(BY DIRECT WIRE TO THE TIMES.) IMPERIAL JUNCTION (Cal.) Dec. 11.—[Exclusive Dispatch.] I have returned to this point from a visit to Calexico, where I went to complete my survey of the situation caused by the diversion of the main stream of the Colorado River into the Imperial Valley country. Southward-bound in the early morning on the twelve-mile run, I found first evidence of the changed condition of things twelve miles from Imperial Junction. Here the railroad crosses the Alamo River by a wooden bridge.

One mile on this side of the bridge, the river, swinging back, is cutting in to the bank on which the rails are laid. Our train passed this point not ten feet from the edge of the river channel. It seemed a hazardous proceeding on soil that crumbles like so much powdered chocolate. Accordingly, on the return trip tonight, I was not surprised to find the track torn up for a mile, and a gang of men working by brushwood fire and relaying the rails some two hundred yards farther back.

This is the second time this process has been gone through with and it is extremely likely the necessity will again occur, for the river has here cut out a channel one thousand feet wide and twenty feet deep. The waters, however, are raised on the east side. Where the railway runs, so the sliding away of the soil goes on continuously. The Alamo River is here a powerful and vicious looking stream, heavily silt-laden. The Southern Pacific Company, as the destruction is not on settled lands.

MENACE OF THE ALAMO. It is not only when leaving the Imperial country, but when entering it that the Alamo River is causing grave anxiety. It crosses the Mexican border at a point seven and one-half miles east of Calexico. Here it is, at the foot of the hill, as the engineers say, the place of special difficulty in managing the flowing water.

Under old conditions the Alamo River at this point supplied the Imperial main ditch, and then its surplus waters flowed north toward Holtville. But now, with an immensely increased body of water, a great river flows north, and from being a surface ditch, has scooped out a deep bed. If this scooping proceeds it threatens the danger of draining away the water from the main canal system. Therefore, all through the summer, efforts have been made to control the Alamo at this point, but hitherto without success.

One dam proved not to be strong enough and broke under the pressure of the waters. Now a massive dam slightly less than a mile long, constructed of three rows of piling chained together with brush and sand bags packed between. This barrier is eight miles long, but it is impossible to risk closing them at present, owing to the immense volume of water which, if checked, would cut out the earthworks at the ends.

If it seems certain now, an unshaken volume of water continues to come down the Colorado River during the next few months, a still bigger dam will have to be made. Meanwhile, the river continues to run wild. If the waters fall, however, the dam may be made ready will no doubt prove effective. This is the danger point at present for the existing Imperial irrigation system.

SERVES ONE GOOD END. Owing to its deep scouring the Alamo River has caused no serious flooding. Instead, it has performed one service by now affording good drainage to a body of land in the Mesquite Lake district and eastward, that formerly suffered from lack of drainage.

Most of the flooding has been caused by New River. At Calexico this stream is considerably over a half mile wide. Much of it is shallow water, but at midchannel the river is sixteen feet deep. Normally it carries no water at all here at this season.

Since Friday night there has been a fall of seven inches showing that the crest of the flood of Gila River of November 30 took eight days to travel to this point. The dam continues to hold. The Mexican Railway, across the border, is swamped and out of business for the present, also a strip of country along the stream from Calexico toward Blythe and Blue Lake is inundated.

The bank of the main canal met and checked this overflow over the agricultural lands, and probably not more than 200 acres under cultivation have been affected. Meanwhile, New River and its associated lakes continue to send a heavy volume of water into Lake. During nearly a year of continuous flow, it has scooped a deep channel at places. After making a circular sweep from Calexico, New River comes close to the railway line three miles north of Blythe. As seen there, it is a broad turbid stream, swiftly flowing between banks over twenty feet high.

The two rivers continue from this point in almost parallel channels only two miles apart until they reach the great inland sea. They both come from the Colorado, and after divergent wanderings here, their waters again combine.

EDMUND MITCHELL.

BODY OF JEWELL.

Corpse, Supposed to be that of Mining Man Discovered in Shaft Near Liano, Mex.

(BY THE ASSOCIATED PRESS—A.M.) NOGALES (Ariz.) Dec. 11.—[Exclusive Dispatch.] H. Gordon Glor, a California metallurgist, while making an examination of the Yeta Tierra placer mine near the Guadalupe Mountains, six miles from Liano, Sonora, Mex., Saturday, discovered the decomposed body of a man in an old shaft. By the gold teeth he was positively identified as Luther H. Jewell, a mining man and brother of Col. Fred Jewell, of Diego (Cal.) bank, last seen at Magdalena, Sonora, May 2. He is supposed to have been murdered for money and a gold nugget worth \$500. Col. Jewell offered a reward of \$500 for his missing brother.

BROTHER IN SAN DIEGO. (BY THE ASSOCIATED PRESS—A.M.) SAN DIEGO, Dec. 11.—Col. Fred Jewell, whose brother's remains are said to have been found and identified near Liano, Mex., has instructed M. E. McLeod and a former employee of Luther Jewell to go to Calexico, California, for the purpose of making an identification. If the identity is established, the body will be buried in Mexico. Col. Jewell says if doubt exists he himself will go to Liano, although his life has been threatened if he should return to Mexico.

After Col. Jewell's former visit to that country in an effort to find his brother, in which he expressed his convictions of foul play, one of the Mexican officials was recalled and it is understood his friends threatened Col.

PROTESTS AGAINST FOLSOM CURE.

CAR RIDER WRITES LETTER TO NEW YORK PAPER.

Afterward Got Five Years for Attempted Escape Through Hole Which He Says Was Already in Wall—Jews Wrote Pat Crews for Holding up Car.

(BY DIRECT WIRE TO THE TIMES.) NEW YORK, Dec. 11.—[Exclusive Dispatch.] The Herald this morning publishes the following letter of interest to Californians:

"Editor Herald: I was caught riding in a freight car in the State and was sentenced to six months imprisonment in the penitentiary. Three other prisoners and myself drilled a hole in the prison wall. We got through it only to be caught in the prison yard. We were tried for attempted escape. I was sentenced to five years in the penitentiary and others got a year and eight months. I don't think that is fair play. The jailer said he knew the hole was in the wall and the court imposed upon me, because I tried to fight for my rights. They hanged a man in Folsom penitentiary the other day."

"I wish you would print this also the public only know of it. I am a native of New York and would be pleased to have you assist me."

(Signed) Cal., Dec. 4, 1934. "A. E."

ARRESTED IN PANAMA.

LETTS WORKING FOR CANAL.

(BY THE ASSOCIATED PRESS—A.M.) KANSAS CITY, Dec. 11.—M. M. Letts, formerly ticket agent of the Atchafalaya, Topeka and Santa Fe Railway, who while working for the company, at Princeton, Kan., in 1932, stole \$70,000 worth of railroad tickets, and then burned the papers to hide his crime, has been arrested in Panama, according to a cablegram received here today. Letts, when arrested, was working under an assumed name as a clerk in the purchase department of the Panama Canal Commission.

Letts has made three sensational escapes from the officers since his first capture in 1932, getting away the last time after his conviction at Ottawa, Kan., on the charge of arson and robbery.

WOMAN BETRAYED CROWE.

AS RESULT, IOWA, SEEKS PAT.

(BY THE ASSOCIATED PRESS—A.M.) DES MOINES, Dec. 11.—Gov. Cummins today issued a requisition for the return of Pat Crowe to Iowa for holding up a street car in Council Bluffs the night of July 2, 1934. A woman betrayed Crowe, a former member of Council Bluffs, in the hearing for a requisition, alleged that she overheard Crowe telling others about the robbery.

LEADS FIGHT PROMISED.

OMAHA (Neb.) Dec. 11.—The requisition issued by Gov. Cummins for Pat Crowe promises to become the basis of a hard legal fight to prevent Crowe's extradition. County Attorney Starbuck declared today that he would fight the extradition of Crowe until he has been tried on the charge of highway robbery in connection with the Cuddy kidnapping.

CRIME BRIEFS.

Footpads Caught in the Act.

SAN FRANCISCO, Dec. 11.—Two footpads were arrested at an early hour this morning just after they had been caught in the act of robbing E. M. Winslow, a traveling salesman. At the police station they were identified as John Welch, alias Condon, and Frank Hastings, alias Shoshone. Both have been in trouble before, but neither has been convicted of a felony. Several shots were fired at them before they surrendered to the officers.

NEW CAPITAL OF TURKEY.

Town of Oakland, Or., Ships 20,000 Birds a Year, Mostly to California.

(Portland Telegram.) Though a town of only 400 people, Oakland, Or., ships more turkeys than any other point in the Northwest. From 15,000 to 20,000 of the birds are exported annually, most of them going to the San Francisco market.

This little town, which lies in a vale between the Cascade Mountains and the Umpqua River, in Douglas county, 180 miles south of Portland, exports enough turkeys during the Thanksgiving season each year to feed the entire city of Portland at one Thanksgiving dinner.

To ship these Oakland birds southward requires six cars, for the special cars which the Southern Pacific Company furnishes for the purpose will each carry about 3000 of the birds dressed.

The manner in which the birds are

Statistics from the California Leads the Whole West.

Report of the Auditor for Department has just been published. The document contains statistics covering a period of ten years, from 1923 to 1933. The report shows that California leads the whole West in many respects. The population of California in 1933 was 3,387,000, an increase of 100 per cent. since 1923. The report also shows that California leads the West in many other respects, such as in the production of oranges, grapes, and other fruits. The report is a valuable document for anyone interested in the development of California.

likely that the operators of Tonopah
will have to look to the mines of the
Owens River Valley for relief from a
condition that threatens to become in-
tolerable.

MONTEZUMA PROPERTY.

About fifty miles north of Keeler,
situated on the same range as the
Cerro Gordo are located the mine and
works of the Montezuma Mining and
Smelting Company. The character of
the ore in the two mentioned prop-
erties is identical, as is also the general
formation of the country rock. The
Montezuma people have been quietly
operating their property for several
years, until now they have about 200
feet of development work. They are
at present working in a solid vein
which measures three feet with an
average value of \$21.45. The ore is ex-
ceptionally uniform in character and
value, although they occasionally en-
counter stringers, which run very high
in gold.

The property is but a mile and a
half from the railroad station at Elina.
The company is considering the ad-
visability of installing a smelter of
its own at some future date. It has
plans drawn, but for the present may
be content with shipping to Keeler.
The company's stock is largely held
in Los Angeles, where the concern has
office on the second floor of the Wil-
cox building annex. The officers are:
J. K. Nolan, formerly general manager
of the Copper King, president; J. G.
Healy, vice-president; F. S. Gordon,
secretary. Gordon Bros. represent the
company in the city.

Another property that is working
steadily in the River, a short distance
southwest of the Montezuma. The
shaft here is down 500 feet.

LOW COST OF WORK.

Operations can be carried on every
day in the year and as the valley is an
excellent farming and grazing coun-
try, fresh beef can be had at low
prices; hay at 15 per ton delivered,
and other articles in proportion, while
at Bullfrog hay runs up to \$30 and
other supplies accordingly.

The mountain streams are expected
to furnish electric power in abundance.
Plants have already been put in on
Hishop Creek and are furnishing light
and power to Tonopah and Goldfield.
When the city gets busy, mining men
say, it can find a market for much
excess power in the valley.

Notwithstanding the fact that there
is no railroad transportation to San Fran-
cisco, many persons enter the country
and take in supplies from Los Angeles
by way of Mojave, driving 125 miles
overland. The construction of the rail-
road between Keeler and Mojave,
which, it is believed, will render this
region directly tributary to this city
so that it will be the fault of Los An-
geles people alone if they do not get
practically all the trade to be obtained
in Inyo and Mono counties and ad-
joining territory in Nevada.

DID IT THEMSELVES.

Vernon People Find that Thoroughfare
Needs Grading and Assisted by
Trustees, They Grade It.

Citizens of Vernon are determined to
induce the incorporation of the town a
success, no matter at what cost. Yes-
terday the suburb was confronted with
the necessity for grading and widen-
ing of Santa Fe avenue through the
town limits. There was also the dis-
agreeing fact of no funds in the treas-
ury.

Determined to complete the work, the
townspeople were invited to help grade
the thoroughfare. The Trustees them-
selves took off their coats and went to
work. Teams were loaned and the
work was begun with every prospect
of a speedy completion. The Trustees,
all of whom worked, are D. E. Burge,
J. J. Furlong, W. F. Holland, W. M.
Stevens and J. E. Loomis.

An attempt will be made to widen
Santa Fe avenue from Vernon avenue
south to Stanton avenue, as St. E.
Huntington has promised to raise the
tracks of the steam dummy line to
conform with the grade of the road-
way.

Other plans are for the grading of
Santa Fe avenue through to the town
of Compton, as much of the right of
way has been secured. Also to grade
Florence avenue from Santa Fe east to
the Downey road.

WHOSE JOKE THIS?

Writer of Anonymous Letter Makes
Demands for One Thousand Dol-
lars but Will Not Get It.

An anonymous letter writer has
addressed a communication to H. C.
Wyatt, demanding \$1000 of him. The
letter was written either by some
would-be jokester or some fool, if it is to
be taken seriously, or possibly by some
person, who had in mind an advertise-
ment scheme and desired to make Wyatt
the beneficiary of it. The letter is ap-
propriately decorated with drawings
of skulls, cross-bones and other ap-
parently terrorizing symbols. The com-
munication is as follows:

"If you do not pay us \$1000, or if
you put this letter in the hands of
those bull-dozing detectives or police,
you will pay the penalty. You will be
watched until we get the money, or
make an example of you. Keep the
money with you after you get this let-
ter until you hear from us, we want
it to go if you pay this you will
never be blackmailed again."
Wyatt does not take the letter
seriously.

A DIMPLE MAKER.

Find a child with dimples
and chubby arms and legs
and you find a healthy child.
Find one with drawn face
and poor, thin body and you
see one that needs Scott's
Emulsion. Your doctor will
no doubt tell you the child is
fat-starved—its food is not
nourishing it.

Nothing helps these thin,
pale children like Scott's
Emulsion. It contains the
very element of fat they need.
It supplies them with a per-
fect and quickly digested
nourishment. Scott's Emul-
sion brings dimples and
rounded limbs.

**WOULD BUILD
FREE HARBOR**

**Private Corporation Securities
Government Consent.**

**Proposes Six Miles of Docks
Within Long Beach.**

**Los Angeles Dock & Terminal
Company Steals March.**

The Times presents herewith the news that a private corporation, the Los Angeles Dock and Terminal Company, backed by Redlands capital, proposes to steal a march on the vexed harbor situation by dredging and building a free inner harbor within the corporate limits of Long Beach, at a private expense of from \$1,500,000 to \$2,000,000.

The United States government has given its sanction to the project. The War Department stipulates that the work shall be carried on under the direction and approval of Capt. McKinstry, resident engineer, United States Army.

The company's plans and specifications call for nearly six miles of wharfage, and channels of a minimum depth of 21 feet and a maximum depth of 32 feet, the latter being more than enough to accommodate the largest vessels afloat.

The company proposes to bear the entire cost of dredging and building this harbor, and expects to make a couple of millions profit out of the sale of adjoining lands.

The project calls for final completion within three years.

Plans have just been perfected, the sanction of the War Department has been gained, and preliminary contracts have been signed, for the construction of an inner harbor, approximately one mile square and from 21 to 22 feet deep at mean low tide, within the corporate limits of the city of Long Beach, at an estimated expense of from \$1,500,000 to \$2,000,000.

The Los Angeles Dock and Terminal Company, composed partially of Redlands capitalists rated as being worth in the aggregate between \$16,000,000 and \$12,000,000, has conceived and proposes to carry out the project.

Actual work of dredging is to be begun this week. On this morning's 10 o'clock tide a dredger of the North American Dredging Company, owned

Here from San Francisco, having an excavating capacity of 100,000 cubic yards a day, is expected to pass through Cerritos Slough into the harbor area, after having been hung up in the slough for more than ten days awaiting a tide. Last night word was received from Long Beach that the Salt Lake Railway Company's spur-track bridge across the slough was being torn out to admit of the passage.

THE HARBOR SITE.
The site of the projected harbor, news of which is now for the first time made public, is immediately north of Seaside Park. It comprises 500 acres of marsh lands, partly submerged, lying three miles east of the city of San Pedro, (recollect that the coast line there bears almost east and west,) 1500 feet back from the ocean and between the main line tracks of the Southern Pacific on the north and the

Main-line tracks of the Salt Lake and the south; the city of Long Beach overlaps the whole with its western boundary line. Long Beach Bay (at present an unimportant widening-out of the slough waters near the point where the San Gabriel River channel opens into the Pacific) lies at the southwest extremity of the harbor site.

In and around the harbor-to-be, as

may be understood by an examination of the accompanying map, the Dock and Terminal Company owns 360 acres (or more) of partially submerged lands. These will be filled 5½ feet, or to the level of the Sall Lake tracks, with the dredgings from the harbor excavations, and thus will be formed the inner harbor's waterfront, wharves, manufacturing sites, yards, slips, etc.

Calculation by the engineers in charge give 30,000 feet, or nearly six miles, as the total dockage under the plans and specifications.

WORKED IN SILENCE.
When, two months ago, the Los Angeles Dock and Terminal Company was incorporated for \$1,500,000, with a paid-in capital of \$500,000, some speculation was indulged as to its real purpose. The public, however, was not let into the secret. That purpose is now made plain: primarily the construction of a commodious and free inner harbor to attract and care for the maritime com-

The 300 acres, clearly of immense value if the harbor project is carried through as planned, were originally a part of the old San Pedro Rancho, and were bought from the Dominguez estate by the Seaside Land and Water Company. One year ago the property passed by purchase into the hands of the Land and Navigation Company, a corporation of Los Angeles and Long

Each men. Six months later, or in last July, Henry P. Barbour, Wallace Brothers, Dana Burks, the Townsend and Damon Company and the C. J. Walker Real Estate Company, bought in the partially submerged acreage at a low figure for the prospective Dock and Terminal Company. C. J. Walker and Townsend and Damon, being at the time part owners through membership in the Land and Navigation Company.

Green City Results.

NEW ORLEANS, (La.) Dec. 11.—Green City results: Five and one-half furlongs: Lena J. won, Holloway second, Orfina third; time 1:07 4-5. Six furlongs: Loretta won, Gallant second, Kohlner third; time 1:15 3-4. Mile and sixteenth: Little Scout won, Pasadena second; time 1:47. Two starters.

FIRST TURBINE ARRIVES.

Great New Germania Reaches New York After Successful Trip Across the Atlantic.

(BY THE ASSOCIATED PRESS—A.M.) NEW YORK, Dec. 11.—The first trans-Atlantic turbine steamer that ever came to this port, the giant steamer of the Cunard line, arrived at her dock today. All the way across the Atlantic, the Germania encountered unusually severe weather, and yesterday, when only a few miles outside the harbor, she was obliged to lay to and let the storm blow itself out before attempting to enter.

"MONK" AGAIN IN SADDLE

Jockey Coburn Given Mount at New Orleans.

Bailed Out of Jail by His Former Wife.

Opening at Inglede Track. Baseball Records.

(BY DIRECT WIRE TO THE TIMES) NEW ORLEANS, (La.) Dec. 11.—(Exclusive Dispatch.) Jockey "Monk" Coburn, who had shooting scrape with his wife here one year ago and whose trial is still pending, his former wife having come to his rescue and secured him bond, arrived here Saturday and today secured a license to ride at the Fair Grounds. It has been quite a while since Coburn was seen in the saddle. He has been at the track exercising every morning. There is a scarcity of good riding material, especially at Coburn's weight, at the Fair Grounds. His former employer, George C. Bennett, of Memphis, is here. It was Bennett that brought Coburn here from San Francisco five years ago. Coburn was the sensation of the year, as he rode winner after winner, especially following spring he easily headed the list of winning jockeys at Memphis and all of the other tracks in the West.

WINTER SEASON OPENED.

(BY THE ASSOCIATED PRESS—P.M.) SAN FRANCISCO, Dec. 11.—Racing was begun at the Inglede track today for a thirty days' season. Weather fine, track fast. Results: Seven furlongs: Lone Wolf, 106 (Giles), 4 to 1, won; Angelica, 162 (Pountain), 5 to 1, second; Rose Eley, 164 (Knapp), 20 to 1, third; time 1:18 1-2. Red Reynard, Ed Sheridan, Lucerne, Velma and Andover also ran.

Five and a half furlongs: Iron Watson, 104 (Herbert), 10 to 1, won; Ramus, 104 (Knapp), 12 to 1, second; Tom Roberts, 107 (Robinson), 12 to 1, third; time 1:09 1-2. Belona, Jillette, Bakersfield, Rusticate, Fulbert, Ebel Thatcher, Lorena M. and John Moore also ran.

Five and a half furlongs: To San, 104 (Adams), 3 to 1, won; Gossiper, 162 (Radtke), 5 to 1, second; Escamado, 167 (Knapp), 5 to 1, third; time 1:09 1-2. George P. McNear, Smithy Kane, Enze Nosa, Bear Hunter, Miss Provo and Sunny Shore also ran.

Mile and fifty yards: San Primo, 104 (Radtke), 17 to 1, won; Christine, 104 (W. Smith), 11 to 1, second; Gateway, 104 (Logan), 12 to 1, third; time 1:44 1-2. Buchanan and Scotch Thistle also ran.

Six furlongs: The Lieutenant, 106 (L. Williams), 11 to 1, won; Blumenthal, 104 (Barrett), 4 to 1, second; Bonnie Reg, 104 (Battista), 5 to 1, third; time 1:15 1-2. Bountiful, J. T. Gratia and War Times also ran.

Seven furlongs: Neva Lee, 104 (C. Miller), 2 to 1, won; Corn Blossom, 104 (Radtke), 4 to 1, second; Beau Ormond, 112 (Logan), 7 to 1, third; time 1:17 1-2. Briarcliffe and Judge also ran.

FIERCE STORM SETS A RECORD.

"SANTA ANA" STANDS HUNTERS ON THEIR HEADS.

Five Hours to Get Home From Pacific Gun Club, and Passage Worked by Shoveling Sand off the Tracks. Sport not up to Expectations of the Clubmen.

The Sunday squad of duck hunters on the southern marshes had the satisfaction of seeing just how bad an Orange County "Santa Ana" can be when it has a thirty-six hour head start, and decided to get real devilish for a change.

Tragic on the Newport branch of the Pacific Electric was tied up hard and fast at Huntington Beach, the shifting dunes of sand lying on each side of that resort drifting across the steel rails like kiln-dried driven snow. Game calls had about as much effect upon it as a bucket of water on a sinking ship. By dint of hard work, a way could be cleared ahead of a car sufficient to permit it to pass slowly toward Huntington Beach, but beyond that resort traffic was stopped, and had not been resumed up to yesterday noon.

Fred M. Lyon left the Pacific Club about one o'clock Sunday afternoon for home. Three hours later, the other members came up with him, heavily shoveling sand with the motorman and conductor of the car, and the outfit was five hours reaching Los Angeles. The storm was the worst experienced since the line has been established, the velocity of the wind being estimated at not far from a mile a minute.

The shooting was not as good as it was expected, the southern clubs proving quite a disappointment, though outside shooters who understood the game managed to scrape together some fair bags by prowling about the small ponds and jumping birds. One party of lads from the Tufts-Lyon store, headed by Al Tipton, slept out Saturday night in a deserted Pacific Electric car, and found many degrees better than the wind-swept beach. They got the limit of sand and walking Sunday, the birds amounting to a mere speck.

The late coming game were crowded with hunters drawn away by the prospect of sport. In Bolsa Bay was opportunity for a good shot to bag twenty or thirty big birds, but none seemed to avail themselves of it.

The Corralles, Pasadena and Alamitos clubs had a fair shot. Big bags were made in the Ballona also, the weather being far more moderate there than farther south.

GUN IN HER MUFF.

ALSO HUSBAND'S MONEY. (BY THE ASSOCIATED PRESS—A.M.) NEW YORK, Dec. 11.—After receiving the first prize money of the sixty-day bicycle race today at the office of T. T. Powers, the promoter of the race, Eddie Root was surrounded by a number of the riders, who demanded a share of the money. They declared that a combination of several teams had been formed by which the race was to be manipulated so that Root should defeat the Redella and win the first prize. Mrs. Root has talked by local sportmen, and it is likely the various club clubs will soon be asked for an expression of sentiment upon the matter.

It is argued that thirty-five is quite enough, and that further protection of the birds is absolutely necessary. The contention is made that voluntary reduction of the limit by the local club would prove a powerful factor in securing legislative action of the same sort covering the entire state.

TO REDUCE LIMIT.

THIRTY-FIVE IS ENOUGH. The reduction of the bag limit from fifty to thirty-five ducks is again being talked by local sportmen, and it is likely the various club clubs will soon be asked for an expression of sentiment upon the matter.

It is argued that thirty-five is quite enough, and that further protection of the birds is absolutely necessary. The contention is made that voluntary reduction of the limit by the local club would prove a powerful factor in securing legislative action of the same sort covering the entire state.

STILL FREE GATE.

DRIVING CLUB MEETS. Thirty of the 250 members of the Driving Club met last night at Christopher's and decided to continue the free matinee policy of the organization, rather than adopt the scheme of admission by card proposed by such of the members as were affiliated with the Los Angeles Harness Horse Association.

It was brought out in a spirited speech by John G. Mott that the local matinees have drawn the biggest crowds of any held in the country, and the decision was practically unanimous after general consideration.

Road carts were finally decided upon for future matinee races, this being one step nearer the approved Eastern practice in gentlemen's driving circles.

Louis Christopher served refreshments in his usual hospitable style.

GOOD BOSTONS FOR PASADENA.

HIGH-CLASS DOGS BROUGHT IN FROM THE EAST.

Los Angeles Fanciers are Breeding Some "Tony" Ones and Steadily Improving Class of Their Kennels. Fred Herr Buys Another Blue-blood—Jim Brooks's Dogs.

Lop-sided in some respects as is bound to be the case with a small show, the Pasadena canine convention which opens tomorrow bids fair to prove quite an educator as to the points which constitute a fine collie, or an approximately perfect Boston terrier. Particularly in the last-named breed

Boston Terrier, Tally-Ho.

is there a metropolitan representation, not only as regards quantity, but also in the quality of the animals exhibited. The showing of Boston last spring at the Southwest Kennel Club's show was one of its features, and the little winter exhibit of the Pasadena fanciers bids fair to go the record several better.

Jim Brooks, the racing magnate has gone in for Boston quite heavily, stocking up largely from Fred Herr's strains. Always looking for the best, there is in the breed, Mr. Herr himself has added extensively to the El Mundo kennel, and recently purchased the good dog, Tally-Ho, which has not been in town a week as yet. He will be exhibited by Mr. Herr against Hietty Green and other blue-bloods re-

Boston Terrier, Tally-Ho.

cently imported by Leo R. Walton of this city, who also aspires to shine in the front rank of local Boston terrier fanciers.

Few dogs excel the Boston terrier in the essentials that go to make up an admirable pet. He is bright, affectionate almost to a fault, kindly disposed toward children, and of peculiarly chic appearance—a miniature bulldog to the uninitiated, though built on radically different "specifications" as the canine humorists say.

That there is something to the Boston terrier, can easily be seen when it is remembered that five years ago there was hardly one in the city. Today some of the finest bred in the country are raised here, and more are winning their way every week.

POOR FISHING.

WINDS RUIN REPORT. Saturday and Sunday saw verified that old proverbial adage, which runs "when the wind's in the east, fish bite the least." All last week there was considerable sport to be had along the coast, particularly in San Pedro Bay, and at Huntington Beach for surf fish. Sunday's catches were infinitesimal, and those who ventured out mostly regretted that they ever left comfortable homes.

SPEED FINES ON THE RISE.

Justice Root Says Autoists Will Pay More Hereafter to Break the Law.

"If you have any friends who like this swift automobile riding, you had better tell them that fines are going up after today," remarked Justice Root grimly, as he confronted a crowd of autoists arrested for fast driving. Those arrested were Edgar H. Howes, Julius Smith, G. E. Gier, H. M. Fuller, J. O. Coshin, being caught on Washington street near Pasadena avenue. Each was fined \$10.

PART II: EDITORIAL, LOCAL AND BUSINESS SECTION

The Logic of Consolidation.

To careful observers of current opinion it is apparent that the prejudice which was at first excited in some quarters against the consolidation of the Los Angeles city and county governments is disappearing as the questions at issue are better understood and appreciated.

The people throughout the regions affected are beginning to see that the plan will benefit every resident and property owner within the limits of the consolidated city and county, and that it can in no wise injure any of the communities in interest.

The fact should be distinctly understood, first, last, and all the time, that this movement for consolidation is not a movement for the expansion of Los Angeles, per se. It is not a movement for annexation in any true sense of the word. It is not a movement for "Greater Los Angeles," although that term has been inadvertently and rather loosely employed in discussing the matter.

It would be just as correct and just as sensible to talk about "Greater Pasadena" or "Greater Long Beach," or "Greater Santa Monica," as to talk of "Greater Los Angeles" in this connection; for all of these towns, and all other which see fit to come under the consolidation banner, will be benefited as much as will Los Angeles, and even more. Pasadena will still be called Pasadena, Long Beach will be called Long Beach, Santa Monica will be called Santa Monica, and so on with all the places embraced within the act of consolidation. Each place will retain its identity, its local characteristics, its local coloring, and its local government.

The consolidated city and county government, according to the plan proposed, will have joint administration of the great public utilities and enterprises, such as the Owens River water, the free harbor, the construction of roads, and other matters pertaining to the general good.

In a class by itself is the great Owens River water project. The benefits of this enterprise are beyond computation. Real estate values alone have appreciated from 10 to 50 percent in the region to be affected since the people of Los Angeles voted to bring this great volume of pure water to Los Angeles and its adjacent territory. In order that the benefits of this abundant supply of water may be enjoyed throughout the territory to be consolidated, the work of consolidation must be consummated as soon and as thoroughly as practicable.

The benefits of consolidation become more and more apparent as the project is considered in all its bearings. A large reduction will be possible in the cost of collecting taxes, and this in itself will be sufficient to justify the plan of consolidation. Instead of two valuations upon taxable property there will be but one, with one assessment instead of two, and the entire will be paid at one place, instead of at two places. This will be a great convenience to the people, besides saving a large amount in the cost of collection, as only one set of assessment agents will be required instead of two. As every taxpayer knows, it is a great annoyance, under the present system, to be compelled to stand in line, sometimes for an hour or more, waiting for the privilege of paying taxes into the public treasury, city or county. If the city and county governments were consolidated, the city and county taxes could be paid at the same place and place, be paid one-half of the valuation and delay, besides a considerable amount in expenses.

An impression prevails in some of the towns outside of Los Angeles that consolidation would do away with local action in the liquor traffic, and that the regulations in force in Los Angeles would govern the entire district under consolidation. No greater mistake could be made. Each town and district would have the same right of decision upon the license question as it now has. In fact, all the rights now enjoyed in the territory to be consolidated with Los Angeles would remain intact, while the larger right of participating in the government of the enlarged territory would be conferred upon the places entering into the plan of consolidation. Los Angeles would not be any means control everything.

It is not to be supposed that the large numbers of people who will be affected by consolidation can be made to see, all at once, the advantages which they will derive from the union. It will require something of a "campaign of education," in which all phases of the subject will be discussed pro and con, to the end that there may be a thorough public understanding of the matter. As friends of consolidation have nothing to fear from such a discussion, for their con-

tentions are sure to be strengthened in the public mind the better the question is understood.

Good progress—though necessarily somewhat slow—is making toward the consummation of the consolidation project. The question is one of great magnitude and importance. We should all be sure we are right before we go ahead. We should be careful to take no steps which we will afterward regret.

For this reason, the fullest possible discussion is desired. But it is a fact so clear that it amounts to a practical demonstration that if any of the people who are eligible for entrance into the consolidation project should fail to come in under the favorable terms about to be offered them, they will regret, in the near future, their error of judgment. This fact will become more apparent as time passes and the plans of consolidation are more fully matured.

A NATURAL UPLIFT.

When a great business comes to town for business, money circles immediately look up; when a man of letters drops in, the writers half-unconsciously put a finger point upon their pens; when a great musician stops for a day the local fraternity take on a bit of temperamental breadth through bearing him—and so the visit of Richard Mansfield, a man who has carved his own way to the highest celebrity through the adamantine rock of opposition, cannot fail to artistically uplift our local stage.

For half a month folks behind as well as in front of the footlights have been anxiously watching for the announcement of Mr. Mansfield's plans. Hour waits in the line before the box office have been adorned by actors who are local idols.

Mr. Mansfield is a peculiar and isolated character. Of nervous and retiring temperament, with a modesty that amounts to real timidity, his enemies have painted him as an actual ogre, and his admirers as a man of iron will and a destructive force of his cyclonic eccentricity have been sent broadcast in poorly placed ridicule.

No player before the public had a harder time to gain recognition. Having made a small success, Mr. Mansfield stood always for art, for human interpretation rather than scenic bewilderment.

Fighting his way step by step, his face has been over forward, and he has chosen only such things as are true or good in their delineation of life.

He is one of the few actors that Americans would not be ashamed to see representing the artistic side of this young nation upon any stage in the world.

WHENCE COMETH FAME.

Newspapers of the northern part of the State often seem at a loss to understand why it is that the smaller cities of that section do not grow ahead like cities of the same class in Southern California. That there is a remarkable difference in the relative prosperity of towns in these two sections of the State is a matter of common knowledge and observation.

Our northern brethren are more or less troubled because of this disparity, and are naturally anxious to know the wherefore.

Of course one great reason for the superior prosperity of the Southern California cities is their freedom from labor union domination, as compared with the subservience of the North to the totem. But there are other reasons, as we shall presently explain.

In what The Times is saying here there is no desire to "knock" the North and its people. The northern part of California is a magnificent section, and we wish it all manner of prosperity. Next to Southern California it is about the finest section of country on the globe.

True, we claim some few natural advantages for Southern California, but not to be found in the North. These need not be enumerated in detail, for they are pretty well known of all men. Our point is that such cities as Santa Ana, Redlands, Pomona, and others, are famous in the East—and in all parts of the world, for that matter, while northern cities of the same class are practically unknown east of the Rocky Mountains.

Why is this? The answer is simple. Southern California cities are not afraid to let their advantages be known to the world through advertisements in the newspapers. Northern California cities are extremely shy in this matter. The immense advantage of judicious publicity have not yet made an impression upon them.

The City of Oakland has recently decided to advertise its many attractions—and to advertise them in Southern California newspapers. The result will doubtless be that Oakland will forge ahead of her sister cities of the Northland at a great rate.

There will be envy of Oakland, and of her prosperity. Perhaps there may be emulation. If other towns of the North would prosper, let them "catch up" to the south, which is really no secret at all, since it is the very reverse of secrecy—witness its publicity.

Yes, these northern cities should imitate Pomona and Redlands and Santa Ana and other stirring southern towns, whose good example has recently been followed by Oakland, and give proper newspaper publicity to their advantages and charms if they would, in a short time, many cities to their stature.

SIR THEODORE & YE REPORTERS.

If ten reporters twenty-four into Sir Teddy came.

"Now tell us, good Sir Theodore, what dearest thou of ye game?"

These up & speak Sir Theodore.

"Ye game thou shoudst quite of me, and of ruddy game—

Ther ben too moche of it."

These was ye apoth of Roosevelt's "For more," they cry, "we're false!"

"I've got," quoth he, "to hurry, else I'll miss ye West Point train."

HELP! HELP!

More room needed at the Courthouse.

THE SAME WAY.

The age is actually cursed by the presence of a lot of faddists who are always dreaming of some panacea to cure all the social and economic ills of the time. The scheme proposed is nearly always extremely radical. Their plans make one think of the fellow who pulled the underpinning from under his house and let it all down in ruins in order that he might drive a nail in to hold a shingle on the roof; or of the farmer who burns up the barn full of grain to get rid of the rats.

The great cry just now is against the system which has worked all through all generations of men, by which individual effort has been recognized and individual success rewarded in proportion to the achievement won. Every step of progress has been made under that plan. The civilization of the world has been wrought out under it. All the accumulated wealth of the world has been created by it. Every comfort and luxury we enjoy is due to it.

When comes the weak-headed, the man who lacks courage in himself, the incompetent whose nature has failed to endow with great gifts, and asks to have this all changed. He wants to have the "knock" the North and its people. The northern part of California is a magnificent section, and we wish it all manner of prosperity. Next to Southern California it is about the finest section of country on the globe.

True, we claim some few natural advantages for Southern California, but not to be found in the North. These need not be enumerated in detail, for they are pretty well known of all men. A photographical reduction of engineer's map. Proposed free inner harbor, to be constructed within corporate limits of Long Beach.

MAKING FREE HARBOR

(Continued from First Page.)

The work of actually forming the Los Angeles Dock and Terminal Company was completed. To make the promoters had gone to the extent of financial backing, from the ranks of prominent men in the financial community.

capitalist, C. C. Ames, member of the Redlands National Bank; A. C. Hubbard, of Ames and Hubbard, president of the Citizens Bank and accounted Redlands' strongest capitalist; Mr. Horner, a capitalist; Horace Water, member of the Los Angeles Chamber of Commerce; and W. M. Campbell, attorney. The stated wealth of several of these men aggregates a backing of from \$10,000 to \$15,000. Dana Burke was made president of the company and Harry F. Harbour, general manager.

As soon as a tentative survey of the harbor site had been completed and the location of the harbor was marked on the map, the next step was to obtain the consent of the United States government to the project. Without such consent, the harbor may not be constructed. The following letter to the Dock and Terminal Company speaks for the success the application met with:

WASHINGTON, Dec. 12, 1905. Sir:—In answer to your letter of the 10th inst., regarding the proposed harbor at Long Beach, California, I am pleased to inform you that the United States government has agreed to the construction of the harbor, and that the necessary funds have been appropriated for the purpose.

A partially submerged structure three miles east of San Pedro, where it is proposed to construct harbor; (top) Salt Lake bridge, now being torn down for passage of dredger; (middle) North American Dredging Company's dredger from San Francisco.

which, though only one has been spoken of in the foregoing paragraph. If the company can, as explained, widen and deepen the mouth of the San Gabriel channel and extend it 200 feet into San Pedro Bay by building jetties, thereby obtaining a mean depth of thirty-two feet, or an entrance channel can be dredged a distance of three miles south and west through Corbin slough, then the harbor of Long Beach, in which event a depth of only twenty-two feet would be obtained, and therefore the company's harbor would not be available to the government.

TO BUILD BUILT LINE

The map lines lettered "A. Dock and Terminal R. R." indicate that it is the Dock and Terminal Company's purpose to build a traction belt line around the harbor.

With the Southern Pacific traversing the north edge of the harbor site and the Salt Lake the southern edge, belt-line driving in transcontinental roads could be made a matter of minutes.

There is some quiet talk that the Salt Lake division, to connect with the Southern Pacific, will run to the new harbor, if the big project is carried out.

And assuming that it is carried out, the waterfront and wharves will be owned by two hundred or more individuals and corporations, instead of being controlled by three. There is the authority for calling the harbor a "free" harbor.

MILK AND WATER.

City Bacteriologist Lectures Before the Students of University of Southern California.

Dr. E. L. Leonard, City Bacteriologist, read an instructive paper before the biology section of the Academy of Sciences in Wilbur Hall at the University of Southern California last night. Bacteria in the milk and drinking water supplies of the city formed the subject.

The water supply of Los Angeles comes primarily from the high Sierras and flows its way into the Los Angeles and San Gabriel Rivers," said the speaker. Sand and gravel composed the river beds and the bed rock is between 200 and 300 feet below sea level. If it were possible to bring this water through the city, the condition cannot be realized. Carcasses of sheep, horses and mules have been pulled out of the Los Angeles River not far from where the waters enter the city mains.

Dr. Leonard thought the ordinary water used for domestic purposes is not as bad as some people think, but still there is room for improvement. He thought the milk supplied at present by the dairies was up to a high standard.

your luck is in your hand. One "ad" will help you to save money and take advantage of the opportunities it presents. Today the opportunity is as follows:

Extra Old Sonoma Claret or Riesling.....
Rare Old Port Wine.....
Sweet wine of different varieties.....

WARD AFTER ROADHOUSES.

Supervisors Stir Sheriff to Sharpen His Stick.

Get Evidence Against Disorderly Resorts.

Result of Exposures by "Times" Reporters.

Board of Supervisors has asked Sheriff to help put the tough roadhouses out of business.

A resolution which passed the board yesterday was directed to a thorough investigation as to the manner in which the roadhouses are conducted and report at a meeting after Christmas.

The matter was brought before the board in the form of an exposé in the "Times" last week. Next day Supervisors moved to take away the old Canby Cottage.

They were again called the attention of the board to the matter.

All gentlemen, when they are asked to take these roadhouses out of business, they ought to have a heart.

They ought to have a heart. They ought to have a heart. They ought to have a heart.

They ought to have a heart. They ought to have a heart. They ought to have a heart.

They ought to have a heart. They ought to have a heart. They ought to have a heart.

They ought to have a heart. They ought to have a heart. They ought to have a heart.

LOP SIDED EDUCATION

Dr. Moulton Demands Bible Classics Together.

Dramatic Recital of Poetry of Scripture.

Makes Strong Plea for Use of Revised Version.

Dr. Richard Green Moulton, of the University of Chicago, author and lecturer, who is well known in literary circles of America and England to the whole world, is to be the guest of honor at the annual meeting of the Los Angeles Branch of the Bible Society, which will be held at the Los Angeles Convention Center, Tuesday, December 16, at 8 o'clock.

He has come to Los Angeles under the auspices of the Southern California Branch of the Bible Society, and will make his first appearance at St. Paul's Cathedral yesterday afternoon, where he was greeted by a large audience of critical character. Ministers of the Episcopal Church, and students, filled the pews to front of the distinguished speaker, and after it was over they stood about in groups and discussed what they had heard. The command was all of the most favorable character, much surprise being expressed at the dramatic power shown by the speaker.

Dr. Moulton is a large, white-haired man, with a broad forehead and a deep voice. He was born in England. He is possessed of fine dramatic powers and easily kept his audience in the palm of his hand. He is a man of great energy, and his command was all of the most favorable character, much surprise being expressed at the dramatic power shown by the speaker.

He is a man of great energy, and his command was all of the most favorable character, much surprise being expressed at the dramatic power shown by the speaker. He is a man of great energy, and his command was all of the most favorable character, much surprise being expressed at the dramatic power shown by the speaker.

LETTERS TO THE TIMES

The Times truly enlightens the eyes of its readers without leading them to any false conclusions. The case of the Bible Society is a clear one, and the presentation of it, as it is, is a most commendable one.

Sakharoff and the Woman. LONG BEACH, Dec. 11.—(To the Editor of The Times.) Since the assassination of Gen. Sakharoff I have been watching the papers to discover some reference to the story with which he was mixed up while the war with Japan was in progress, but as yet have not seen any intimation of it. Possibly it has been retold and in sending this to you I am carrying coals to Newcastle, but I'll take the chance.

I saw the story in a French newspaper last spring and coming from such a source I am disposed to give it credence. Sakharoff had been ordered to Manchuria by the government at St. Petersburg to report to Gen. Kuropatkin at once. In his company was a young lady of cavalry who had just married a beautiful woman who naturally wanted to accompany her husband to the front. To do this as his wife, was a great violation of the law, and so to evade the law and still realize her husband's desire, she had a sister, a sister of charity, and took the same train that her husband took. On the way across the frontier, however, she was discovered and the beautiful face and form of this disguised wife, learned of her violation of the law, was repulsed by the bride, took advantage of her power as the superior officer of her husband's regiment, and ordered her to get out of the train. She did so, and on her arrival at the front played the same part as the husband's sister. King David played on Uriah, viz., ordered him into the forefront of the battle where he was to be killed, and where he was killed.

As I was reading the daily paper I saw a matrimonial notice of a young man's marriage by the Outcure treatment. I knew by experience your medicine is all it claims to be. I had a lady who three months old and came to me on her head and face. I tried several kinds of medicine without any benefit, and then decided to try Outcure. I could see an improvement at once, and in a very short time he was entirely healed. He is now three years old and a picture of health. I have tried your medicine on a number of my children and was also cured by the use of Outcure. I came to me to ask what I could do for her, and I was more than ready to recommend Outcure, because of the speedy cure of my lady. I found the same result that I did. (Signed) Mrs. L. L. Brown, Corvallis, Ky., May 23, 1924.

(NEWS REPORTS FROM TIMES CORRESPONDENTS.)

JURY HONORS DEAD FIREMAN.

HE IS DECLARED A HERO OF RIVERSIDE WRECK.

Coroner's Inquest Results in Verdict Declaring Inability to Place Blame on Any Particular Person but Recommending that the Railroad Crossings at Tower Ten be Filled.

(BY DIRECT WIRE TO THE TIMES.)

RIVERSIDE, Dec. 11.—[Exclusive Dispatch.] Walter Cave, who met his death last Friday morning on the derailed train at Tower No. 10, in this city, died like a hero. This is the verdict of the jury which met today to pass on the case of the train crew, and especially of Engineer McCardie. When the train left the rails, Cave jumped for the safety of the crossing. He turned off and thus saved a bad fire following the wreck. For some reason now unknown he had to mount the tank to work the valve and this brought him to his death. He was one of the most respected railroad men in the service of the Santa Fe.

The coroner's jury finds that Walter P. Cave came to his death as a result of being pinned under the oil tank of engine 461 of train No. 10, on the Santa Fe tracks, near Tower No. 10, and the jury, are unable to place the blame on any particular person, but they recommend that the railroad crossings at Tower No. 10 be filled up to the level of their roadbed, so that upon opening the derailing switch an engine can pass over the crossing without endangering the lives of the employees. They further recommend that the two men be employed in the lower at said intersection, so that they will be no necessity to stop trains crossing each other's track and that trains be compelled to go around the safety block before coming to a stop.

We further compliment the memory of Walter P. Cave, that in the last moments of his life he was present to prevent loss of property to his employers and to preserve the safety of passengers by staying at his post and closing the safety valve.

SAN BERNARDINO.

INFANT STOPS DIVORCE SUIT.

SAN BERNARDINO, Dec. 11.—The second divorce case was stricken from the court calendar this morning. The young couple, after arguing in court, decided to remain married. The father, who was charged with molesting the child, was released. The mother, who was charged with molesting the child, was released. The father, who was charged with molesting the child, was released. The mother, who was charged with molesting the child, was released.

STORM RUINS LUMBER.

Hundreds of thousands of feet of lumber on the mountains have been seriously ruined by the recent windstorm. On Saturday all the lumber companies reported that the great quantities of lumber which had been piled up in the mountains were ruined. Much of the lumber which was carried off is strewn for miles in the valleys. The lumber companies are now trying to salvage what they can. The lumber companies are now trying to salvage what they can.

DEATH DEBATE IN RACE.

Mr. W. A. Tamm, of the city of Los Angeles, died this morning. The death of Mr. Tamm was a great loss to the city. He was a prominent lawyer and a member of the state bar. He was also a member of the city council. He was a great leader and a great friend. He was a great leader and a great friend.

FREAK OF IRON HORSE.

Engineer E. K. Long of the Santa Fe, who arrived here last night, was struck by a narrow gauge engine on the opposite track. The engine was pulled into the Santa Fe tracks and the engine was pulled into the Santa Fe tracks. The engine was pulled into the Santa Fe tracks and the engine was pulled into the Santa Fe tracks.

POVERTY-STRIKEN OLD MAN MAY DIE.

Either while walking in his sleep or in a fit of delirium, old and poor, A. W. Jarvis, who lived in a rooming house at No. 533 San Julian street yesterday and will probably die.

LEFT LIGHTS BURNING.

Burglars last night entered the home of Dr. C. A. Bailey, Tenth and Flower streets, and departed leaving the electric lights burning. The burglar was caught by the police. The burglar was caught by the police.

COLTON.

FIRE-FREE FOR LIVES. The fire department district of the narrow escaped destruction by fire last night. The fire department district of the narrow escaped destruction by fire last night. The fire department district of the narrow escaped destruction by fire last night.

ALL SICK WOMEN SHOULD READ MRS. FOX'S LETTER

In All Parts of the United States Lydia E. Pinkham's Vegetable Compound Has Effectuated Similar Cures.

Many wonderful cures of female ills are continually coming to light which have been brought about by Lydia E. Pinkham's Vegetable Compound, and

Mrs. Fannie D. Fox

through the advice of Mrs. Pinkham, of Lynn, Mass., which is said to sick women absolutely free of charge. Mrs. Pinkham has made a study of the ills of her sex and has consulted with and advised thousands of suffering women, who today owe not only their health but even life to her helpful advice.

Mrs. Fannie D. Fox, of Chestnut Street, Bradford, Pa., writes:

"I suffered for a long time with womb trouble, and finally was told by my physician that I had a tumor on the womb. I did not want to submit to an operation, so wrote you for advice. I received your letter and did as you told me, and today I am completely cured. My doctor says the tumor has disappeared, and I am once more a well woman. I believe Lydia E. Pinkham's Vegetable Compound is the best medicine in the world for women."

The testimonials which we are constantly publishing from grateful women establish beyond a doubt the power of Lydia E. Pinkham's Vegetable Compound to conquer female diseases.

Women suffering from any form of female weakness are invited to promptly communicate with Mrs. Pinkham, at Lynn, Mass. She takes nothing in return for her advice. It is absolutely free, and to thousands of women has proved to be more precious than gold.

It is the burning light and a hasty examination of the premises disclosed that an entrance had been forced through a side window on the first floor.

One bedroom was rifled of a pair of opera glasses valued at \$10 and several pieces of jewelry worth \$50 each. In the hasty examination of the rooms the burglars overlooked a strong box containing a fine assortment of jewels and money, but the audacity displayed by leaving the electric lights fully burning was considered something of an innovation in the eyes of Detective Cowen and Boyd, who were detailed to investigate the case.

PERSONAL.

A. B. Mitchell, manager of the Holbeck Hotel, returned yesterday from a trip to San Francisco.

Dr. E. S. Northrup has returned from New York. His daughter, Miss Clara Northrup, in Bloomfield, N. J., who has been very ill, is better.

Every Woman.

It cures all female ills. It will be a real advertisement for the city of Los Angeles.

THE SECRET OF POWER

A PRICELESS GIFT TO ANY MAN OR WOMAN

To once more have Health, Strength and Vitality, to regain your Energy and Ambition; to have the power of Thinking and Reasoning; and to be free from Pains and Aches. These are the uppermost desires in the mind of every man or woman. What more could you expect? What else would you ask?

You who have borne years of suffering would indeed be grateful to know that there is within your grasp a certain cure—THAT CURE IS ELECTRICITY.

You may have heard of it, and read of some of the wonderful cures it has made, but still you seem skeptical and afraid to venture; your hesitation, no doubt, being due to the many disappointments occasioned by ordinary treatment.

IT IS ONLY WHEN ONE MAN MEETS ANOTHER whom he knows to have been in bad health, but finds him full of life and vitality, and in good health, that he realizes that there is something marvelous in Electricity. The result is, there are thousands of men and women made strong and healthy by its use. Still there are thousands more who need it to get well, but who cling to the old methods of treatment, gaining but scant relief.

NOW, MEN AND WOMEN, I APPEAL TO YOU! If you want to feel well; if you wish to be strong and vigorous; if you desire to be free from pains and aches, then turn to the more modern remedy—Electricity. Use DR. McLAUGHLIN'S ELECTRIC BELT.

It is what every sufferer from Weakness, Lassitude, Loss of Power, Nervousness, Weak Back, Insomnia, Indigestion, Constipation, Debility, Dyspepsia, Stomach Trouble, Skin and Blood Diseases, Kidney and Liver Troubles, Rheumatism, Sciatica, Lumbago, Rupture, etc., requires. It will absolutely dispel all waste in the system.

44 Shattuck St., San Francisco, Cal. DR. McLAUGHLIN—Dear Sir: I suffered great pain from lumbago for years before I consulted you. At times I was confined to my bed and could hardly move a muscle of my back. The belt soon had its effect upon my trouble, and I have not had occasion to resort to its use for months. I feel much stronger, and I feel much stronger, and I feel much stronger.

JOHN GARR. MRS. H. WILLIAMS.

CUT OUT THIS COUPON

and send it to me today. I have a book which every man should read (one for women also). It tells facts that are of interest to every man who wants to remain young in vitality at any age. MEN Remember This

Improper measures, rather than DISEASE is very often the cause of your long-standing trouble. The Diseases of Men are peculiar diseases and require special attention.

DR. MORTON, 316 South Broadway

Hours: 9 to 4; 7 to 8
Sundays, 9 to 12

Functional Weakness
My treatment for weak men accomplishes more in two to four weeks than could ever be hoped for by guessing through the mail. I use and know that each treatment has its effect. Good results cannot be had in any other way. The method I use is most rational, direct and certain, whereby functional difficulties may be repaired.

Varicocele
Cured in 4 to 6 days by my original method. No pain, no return of the trouble.

Stricture
My certain method of curing stricture has won for me the praise of thousands. It is direct, thorough and reliable. I have no mail or unreliable treatment of any kind to offer you. Nothing but personal attention.
